TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Biologist 

RE: Site Inspection, Redmond Minerals, Inc., South RCS Salt Mine, S/039/002,
Sanpete County, Utah

Date of Inspection: August 7, 2003

Time of Inspection: 10:30 a.m.

Conditions: Clear, warm

Participants: MaryAnn Wright, Vicky Southwick, Tom Munson and Lynn Kunzler, DOGM

Purpose of Inspection: To familiarize staff with this site.

Getting to the Site:

This mine is located North of the town of Redmond (by following the signs) or by turning west off Highway 28 in Axtell, Utah.

Observations:

The operations were active during this inspection. No one was available to give us a tour of the mine. However, they did allow us to drive through the mine site. The various clay pits, historic disturbance, the underground mine (salt) portal, product stock piles and facilities were observed and identified. It was also explained that because much of the mining is by underground mining methods, there is not much opportunity for concurrent reclamation. The Division was also given a video of the operations for staff to view.
